Contact us for details about our comprehensive CTS OneSolution® covering all mentioned stages of our security solution

CTS OneSolution®

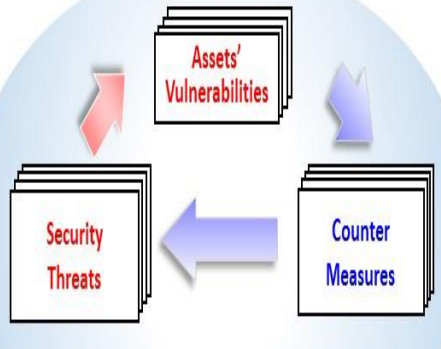

The security process commences with the analysis of **Security Threats** – Direct, Indirect, Non-conventional, Miscellaneous

Threat Analysis and Risk Assessment to identify Assets' Vulnerabilities and determine Client's Security Needs

Security Planning, Layered security ensured through combination of physical and technical security

Re-evaluation and Client Feedback, including any change in client's organizational, operational, administrative parameters

Execution of Security Plan, to include few or all of the following measures:

- Physical security
- Technical security
- Electronic and cyber security
- Security against physical and natural hazards (fire, flood, earthquake etc)
- Evacuation security

Our security process ensures that real time threats are evaluated to identify the risks and vulnerabilities of the assets and appropriate counter measures are taken to mitigate the risks

Regular Inputs provided, depending on client's requirement, to include Daily Incident Report, Daily Security Report, Weekly Security Report, Monthly Security Report, Travel Advisory, Audit Report etc

Security Audit Regular audits held and audit report generated

Training and Rehearsals Training in the form of briefings and discussions, demonstrations, and rehearsals of essential security procedures where required
